

 **Microwaveable Heatpad**

*'Top Tips' - for your sales team!*

The  has advantages over a traditional hot water bottle because.....

- *It holds heat up to 12 hours once heated in a microwave. Microwave times are stipulated on the heatpad. The heat will literally last all night!*
- *No need to fill from kettle & hence minimizes risk of scalding. SnuggleSafe is SGS tested for pet safety.*
- *The SnuggleSafe is hygienic, quick and easy to use.*
- *The SnuggleSafe is bite resistant.*
- *Hot water bottles draw heat from the body once they have cooled. When the SnuggleSafe cools to room temperature you can re microwave and benefit from prolonged warmth time & time again.*
- *Every SnuggleSafe comes with a washable cozy cover.*

The  has advantages over a wheat bags because.....

- *The SnuggleSafe holds heat up to 12 hours once heated in a microwave. Microwave times are stipulated on the heatpad. The heat will literally last all night!*
- *Wheat bags must be kept damp to prevent combustion. Because of this, wheat bags do have a tendency to go moldy & therefore can smell bad. The SnuggleSafe needs no special attention as long as it is used as per instructions contained in packet.*
- *Wheat bags are not washable, unlike the SnuggleSafe which is hygienic & easy to use time & time again.*
